linkedin | g i t h u b |

CAREER OBJECTIVE

ECE graduate (8.39 CGPA) with hands-on experience in Python, SQL, JavaScript fundamentals, Git/GitHub and computer vision projects. Strong foundation in OOP, DSA and problem solving, with a focus on building reliable software solutions and learning backend, API and scalable application development.

EDUCATION

B.Tech – Electronics and Communication Engineering | CGPA: 8.39/10 | 2022–2026
Nalla Narasimha Reddy Education Society's Group of Institutions, Hyderabad

Intermediate (MPC) | CGPA: 8.6/10 | 2020–2022
Telangana Social Welfare Residential Junior College for Girls, Hyderabad

SSC – Sagar Grammar School, Hyderabad | CGPA: 10/10 | 2020

TECHNICAL SKILLS

Programming: Python, C, SQL, JavaScript (fundamentals)
Libraries / Tools: YOLOv8, OpenCV, NumPy, Pandas, Matplotlib, Git, GitHub, VS Code
Core CS: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), DBMS, Operating Systems
Web / Development: HTML, CSS, JavaScript, Bootstrap, React ,Python Full-Stack fundamentals
Networking: TCP/IP, OSI Model, Network Switching & Routing

PROJECTS

Vision-Based Crowd Detection & Stampede Risk Prediction System(Project link) |Team Lead|2025–26

- Built a Python-based computer vision system using YOLOv8 to detect and track people from live webcam/video input.
- Implemented automated bounding-box counting and classified crowd density into Low, Medium and High levels.
- Developed threshold-based alert logic to identify high-density conditions and trigger safety warnings.
- Designed a visual overlay to guide movement toward safer, less-crowded pathways.

Arduino-Based Alcohol Detection System with Steering & Engine Locking |Team Lead | 2024–25

- Integrated an MQ-3 alcohol sensor with an Arduino to monitor driver breath/alcohol readings.
- Implemented threshold-based control logic to determine sobriety levels and activate safety actions.
- Configured buzzer and engine-locking relay logic to prevent vehicle operation when limits were exceeded.
- Integrated an LCD interface to display driver/passenger safety status in real time.

TRAINING & CERTIFICATIONS

- Python Full-Stack Development Program – Python, HTML, CSS, JavaScript, Git/GitHub
- Data Structures & Algorithms – Striver's A2Z Sheet; practice on LeetCode and Naukri Code360

PUBLICATION

Vision-Based Crowd Detection & Stampede Risk Prediction System – Submitted to INDIAN DESIGN 2026, Status: Under Review

RELEVANT STRENGTHS

Python backend fundamentals • SQL • JavaScript fundamentals • Git/GitHub • OOP • DSA • Problem solving • Team leadership • Continuous learning
